point design.*

Empowering Student Well-Being & Learning

Introducing the Oracle chair, a revolutionary design prioritizing student well-being while embracing adaptability and inclusivity. Its innovative features create a responsively comfortable and empowering learning environment for all.

alliedusa.com/oracle

Comfort & Posture,

“We set out not to build just “another student chair,” but to really push the boundaries of what’s possible in design, engineering and manufacturing—to build something completely new.”

— STEVE PRYOR, Lead Designer

Redefined.

At the heart of Oracle’s unique design is its groundbreaking Dual Wall Shell.

The shell’s unique materiality and construction enables Oracle to provide personalized support through the Active Contour Seatback and Compression Seat Zone. These features ensure even pressure distribution, reducing fatigue and enhancing focus. This combination of design elements goes beyond mere comfort. It actively contributes to enhancing student focus and well-being, fostering a dynamic learning environment where students can thrive.

Oracle is manufactured in the United States from highly recyclable HDPE material. A material chosen for its eco-friendliness and superior recyclability over polypropylene.

A Synergy of Design & Engineering.

Unmatched comfort and durability.

Active Contour Seatback

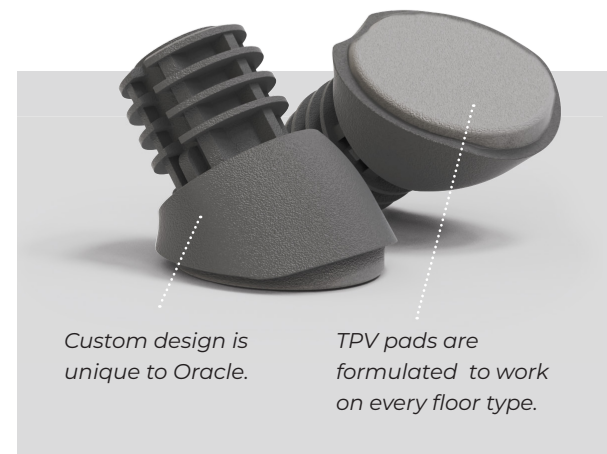

Oracle's backrest seamlessly conforms to each student's unique body shape, offering a "catch and release feeling" for personalized support and promoting proper posture, vital for students during long periods of learning. The gentle flex in the back mimics natural movement, encouraging students to find their optimal learning position.

Pressure Sensitive Glides

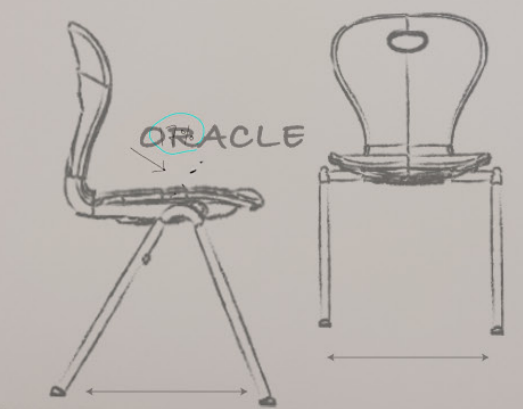

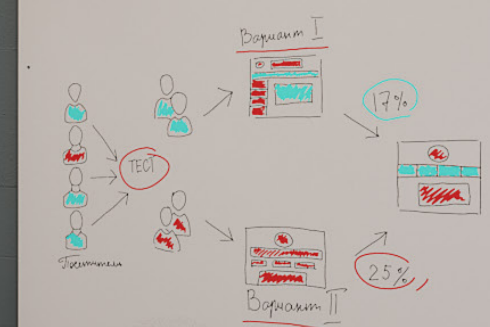

Oracle's glides actively counterbalance the student's body weight, they encourage a natural shift of weight into the seat back, promoting optimal posture and comfort. Furthermore, these glides are constructed from environmentally friendly Thermoplastic Vulcanisate (TPV) material which seamlessly adapts to various floor surfaces.

Compression Seat Zone

The Compression Seat Zone is innovatively designed to respond to body movements, providing dynamic cushioning and reducing stress on key pressure points. This combination of design elements not only maximizes comfort but also actively contributes to maintaining student focus and well-being.

Environments Reimagined

Engineered to Last.

Guaranteed Durability

The Oracle chair goes beyond functionality. Its durable, fully welded steel frame ensures longevity and is fastened to the shell via 6 metal-to-metal connection points. These inserts are molded directly into the chair shell, which creates a multidirectional bond for long-term use.

BIFMA x6.1 Certified (and beyond)

Ensures that the chair meets rigorous industry standards for safety, durability, and sustainability, providing peace of mind for educators and decision-makers in educational settings.

Beyond “standard testing”—at our request, our independent lab (Intertek®) performed extended durability tests. Oracle exceeded the BIFMA functional load test by 5.85 times and proof load testing by 3.9 times, with an incredible 878.5 lbs of pull to deformation.

No Pinch-Point Frame Design

Oracle’s no pinch-point design ensures safety in varied sitting arrangements. Unlike many student chairs, all the gaps and spaces along Oracle’s frame and shell are larger than 1 in., making it an ideal choice for dynamic and interactive classroom settings.

Best in Class Warranty

As with all other Allied products, Oracle is backed by an industry leading warranty.

Designed to Stand Out.

Materiality:

Green, Strong, Comfortable.

Made from eco-friendly and highly recyclable High-Density Polyethylene (HDPE), it minimizes environmental impact while ensuring superior strength and heat dissipation for long-lasting comfort. This innovative choice reflects our commitment to a sustainable future and the well-being of every student.

4 Student Sitting Positions

There’s nothing more important than student choice in modern education. Oracle is designed to empower students with the flexibility to choose their seating position. With the option to sit front, back, or on either side, Oracle caters to diverse learning styles and activities, allowing students to engage in lessons in a way that feels most natural and comfortable to them.

Finishes

Launching in 6 standard colors, that correspond to Allied’s complete furniture portfolio, the Oracle allows schools to customize their learning spaces and create inspiring environments that reflect their unique personality.

CUSTOM COLORS AVAILABLE ON PROJECT ORDERS.
