

SPECIFICATION SHEET

Artisan Wood Collection

18" and 24" X-Base Stool

Allied's X-base wooden stools are a great option for schools, labs, and other settings where aesthetics, durability and sustainability are important. They are made from eco-friendly Para-wood, which is a responsibly grown, harvested, and renewed resource. The stools are also incredibly strong and highly durable, thanks to their full under-seat support apron. The hard smooth finish is available in black and a natural wood color similar to maple.

Solid Hardwood Legs: Solid horizontal supports for stability. Edges are smoothed and fully rounded for enhanced safety.

Solid Hardwood Seats: 14" diameter by 3/4" thick. Smooth bull-nose edges for comfort.

Solid Hardwood Stools
